Our Approach

1. Brief

We take a consultative approach by thoroughly qualifying your brief by way of a consultation call with one of our in-house Technology / Industry SMEs.

2. Headhunt

We map out & target the passive candidate market to find the perfect match for your role. We undertake a 3-stage quality and due diligence check on each candidate. This includes references, mock interviews and technical assessments.

3. Shortlist

We present you with 3-5 options, and you decide who you want to take forward to interview. Quality over quantity is our mantra.

4. Offer & Beyond

We manage the offer process and support with after-offer care to ensure the smoothest onboarding process. Followed by a monthly check-in for 6 months following.
